

Online Q&A for Amine Best Practices Group

Amine Q&A

Amine Q&A is a B2B site with multi-level user access authentication developed for the Amine Best Practices Group (ABPG). The site is a forum for questions and answers on the subject matter of Amine treating, a petroleum refining process.

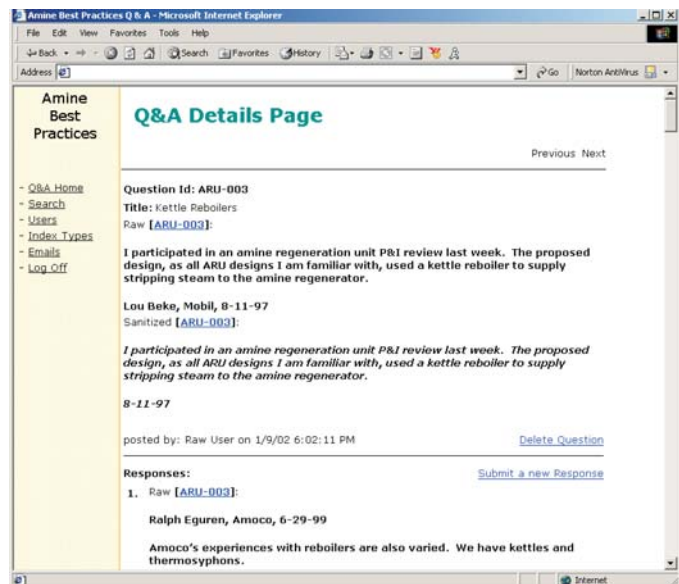

The major features of this site are:

- Multi-level authentication
- Search criteria is clearly highlighted in the results
- Different views of the same data to different user types
- User access recall
- Seamless manager interface
- Indexing system
- Versatile sorting feature
- E-mail notification

“Astron International created for us an independent environment on the Web where members can participate in a Q&A forum, and exchange ideas. We are able to manage and maintain the site by ourselves and that’s what makes it great!”

Duke Tunnell
Cofounder, Amine Best Practices Group

Astron Services at Work

ABPG and Astron worked together to conceptualize and develop the Q&A site. The site was developed using the following Microsoft technologies - IIS 5.0 and ASP.
